Daystate Red Wolf Hi Lite Walnut Air Rifles

£ 2,233

Description

DAYSTATE RED WOLF Walnut .177 The all-new Red Wolf holds the mantle for the most advanced PCP sporter in the world - and for good reason. A breath taking picture of elegance on the outside, secreted within it's sidelever- operated computerised action lies the very latest electronic MCT technology developed from the Pulsar program. Digitally regulated for a super consistent high shot count and sporting a trigger that incorporates adjustability of both release and finger placement, the Red Wolf delivers match like accuracy at the very extremes of airgun ranges . Its masterfully sculptured stock looks fantastic and feels fantastic. Aiding the Red Wolf's user friendly handling is a lightweight carbon fibre bottle (although a steel option is available) above which sits a fully shrouded carbon barrel that helps mute the muzzle report in the field. And, of course, the Red Wolf's new sidelever design marries effortless cocking with speedy loading courtesy of Daystate's latest generation, auto indexing magazine. In looks, handling and performance, the new Red Wolf is pure airgun artistry. Ambidextrous stock and sidelever reversible
